Summer Pedi Savior

Kerasal products aren't glamorous...but let me tell you, they get the job done. Available on drugstore shelves nationwide, this line of foot moisturizers and exfoliators incorporates "fancy" ingredients like alpha hydroxy acids to leave feet moisturized and soft.

My summer pedicure savior is a bit of Kerasal's new **Extra Strength Moisturizer** massaged in around my toenails each morning. One of the major issues with pedicure chipping is dryness, so this really does the trick. The creams are also unscented, so there's no conflict with your body cream or [perfume](#) of choice.

If you'd rather order online, visit www.drugstore.com to purchase.
